The Abstract of the Disclosure is objected to because it does not meet the requirement of the MPEP for US application. Correction is required. See MPEP §608.01(b).

Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts, compounds or compositions, the general nature of the compound or composition should be given as well as its use, e.g., "The compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class. For processes, the type reaction, reagents and process conditions should be stated, generally illustrated by a single example unless variations are necessary. Complete revision of the content of the abstract is required on a separate sheet.

Applicant is respectfully requested to amend the abstract because at present the Abstract is not in US format. .

Claims **3, 31, 34 and 36** have been cancelled, claims **2, 4-30, 32, 33, 35 and 37-65** have been amended, the disclosure has been amended at page 1, and new claim **66** have been added as per the preliminary amendment filed December 15, 2005. One Information Disclosure Statement (1 IDS) filed November 15, 2007 has been received with all cited references and made of record.

Claims **1, 2, 4-30, 32, 33, 35 and 37-66** remain in the case.

Note to applicant: when a rejection refers to a claim **X** at line y, the line number "y" is determined from the claim as previously submitted by applicant in the most recent response including ~~lines deleted by line through~~.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

"A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent."

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States."

(e) the invention was described in

(1) an application for patent described under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application filed under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a)."'

(f) he did not himself invent the subject matter sought to be patented."

**Claims 1, 2, 4-30, 32, 33, 35 and 37-66** are rejected under 35 U.S.C. §102(b) as being anticipated by **EPO application 02077219.0**, filed June 7, 2002.

Applicant is respectfully requested to note that the parent of the instant national stage application, PCT/EP03/06120, was filed more than one year (June 10, 2003) after the filing date for the EPO application cited above. Examiner has checked the calendars for June, 2002 and June, 2003, and could not find by inspection any basis for invoking any federal holiday or weekend exception. Therefore, the above cited EPO application anticipates the instant application's claims.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. §103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. §1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. §103(c) and potential 35 U.S.C. §§102(f) or (g) prior art under 35 U.S.C. §103(a).
